Babies' Health Contest Draws Mothers to the State Fair

COMMISSIONER COHEN AND PRIZE CUP AND BABY.

You would guard your baby with your life, but how much better to guard it with your brain. One million babies are now entering their first summer, and one out of every fifteen of these will die, according to medical statistics, from heat, poor nourishment and the wrong clothes. Do you want your baby to be one of the fifteen? If not, learn how to keep your little one from heat suffering, from the wrong food and from clothes that sap its little strength.

Through the examinations, mental and physical, the securing of points both good and bad, the scientific object lessons and reading matter provided by the Babies' Health Contest at the Kentucky State Fair, which will be held this year the week of Sept. 10, thousands of mothers are enabled to judge just what dangers are threatening their babies, just what ills to remedy and just how to keep them in prime condition.

If you had a hog, a horse or cow you would learn and know something of its care, because it is valuable. Isn't your baby worth more than horse or cow or pig? Is the care of those interested in the promotion of scientific baby care. They argue that, no matter how lovely, how dimpled, how pink

and white and sweet it is, there may be disease or deformity lurking under this beauty, and this is an evil of which you should be forewarned.

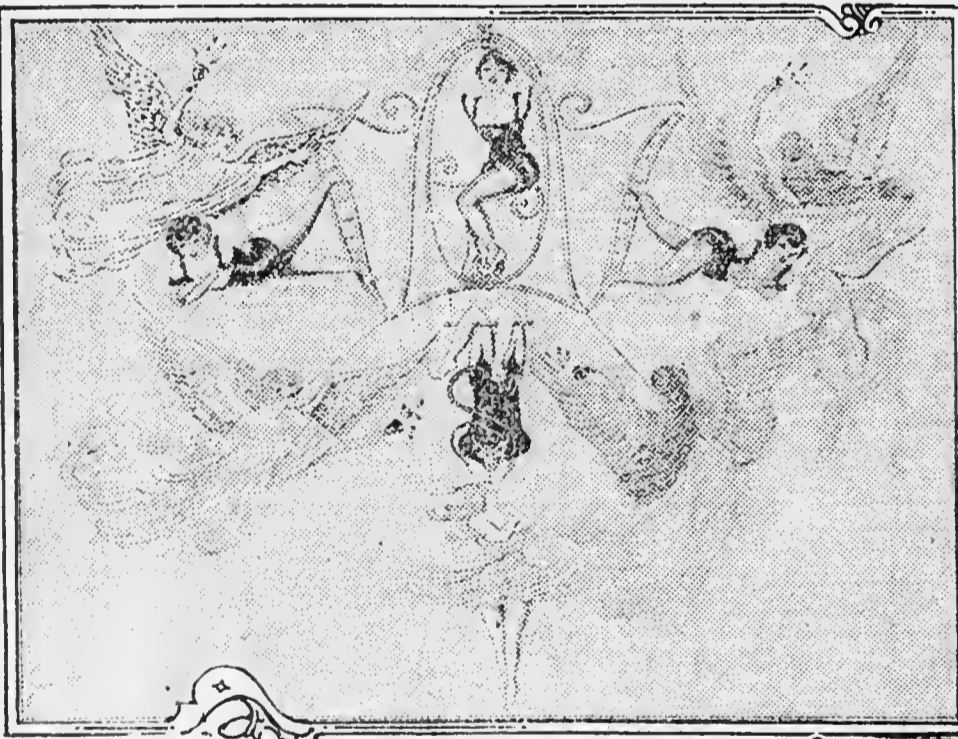

Up to date mothers throughout Kentucky are not only entering this contest to find out about their babies, but are coming back year by year to mark the progress this knowledge has given them and the improvement it has made in their children.

The contest this year, which is under the supervision of Mrs. John L. Woodbury, will be marked by a number of innovations, among which will be an elaborate display of knitted goods for babies and the giving away of patterns for these articles to the mothers desiring them.

Another attractive feature will be the spectacular parade which will mark the baby contest. This parade will be arranged as a beautiful spectacle in the Hippodrome pavilion and will show every little tot entered in the contest to the greatest advantage.

Entrance to the Babies' Health Contest is free and is open to babies between twelve and thirty-six months throughout the state of Kentucky. For catalogue or information address Fount T. Kromer, Secretary Kentucky State Fair, Suit 604 Republic Building, Louisville, Ky.

Marvelous Entertainment Features On the State Fair Program

THE WHIRLING ERFORDS.

THE Kentucky State Fair is a valuable, instructive and progressive institution, but to the average person it is the amusements offered by the fair which constitute its greatest appeal.

In the Hippodrome exhibition, to be held nightly in the Live Stock Pavilion, there has been secured an entertainment which will outrival anything of the kind ever offered. The horse show which has heretofore distinguished the Kentucky State Fair will again be given in its entirety, and yet in addition to these features, which are well worthy a \$2 admission fee in themselves, the management is providing the added and unrivaled glory of a world's championship five gaited saddle horse stake of \$10,000, which will be offered in combination with both Hippodrome and horse show for the unprecedented admission price of 50 cents per person.

Some of the features will be: The Helen Leach-Wallin Trio in a grand aerial whirling exhibition which is said to be the most thrilling of its kind ever offered.

They will be followed by the Four Rodeos, who are equilibrist of the unbelievable skill and strength.

The Tasma Three are a trio of fetching young girls who present one of the most dangerous and sensational wire acts in the show business.

The Bellchairs Brothers, "daredevils of the arena," do a death defying stunt in which one makes a sensational dash

down a steep incline in a miniature auto, loops a great arc and flies from the abandoned car on to the outstretched hands of his partner, who holds him aloft despite the terrific impact.

The Novel Brothers are described by their billing. Their specialty is clowning and music.

Olympia Des Vall & Co. is reputed to be one of the most beautiful and wonderful equestrian and canine exhibitions in America.

Holland and Dockrill offer sensational horsemanship riding and whirling driving with four magnificent Arabian horses and a gold Roman chariot.

Adela Von Old boasts but the one horse, but she is said to provide a whole show. Miss Von Old is regarded as the most noted cowgirl in America.

The piece de resistance of the roster will, it is claimed, be Erford's Marvelous Whirling Sensations. The keynote of this act is aerial whirling in picturesque array of angels and demons. One of the prettiest features is the "Dance of the Demons" and a finale on musical bells.

This entire wonderful program will be crowned and completed by Cavallo's great Concert Band of forty musicians. They are said to be richly informed.

The Kentucky State Fair Catalogue for the 1917 Fair, to be held in Louisville the week of Sept. 10, lists 6,000 prize ribbons, over 100 cups and trophies, valued at \$5,000 or more, and a money award total of \$50,000.

DAIRY FACTS

CALVES DROPPED IN AUTUMN

More Easily Raised and at Lower Cost Than Those Coming in Spring—More Time for Care.

Calves dropped in the fall are more easily raised and at the lowest cost. Spring calves do not receive much benefit from grass the first season because for some months after birth the ruminating stomach is undeveloped, not to mention the effect of the summer drought on the summer heat.

When given a good start milk and dry food can be given and the growth is not checked. In the fall there is more time to give to their care and feeding. Fed mostly on sweet skim milk and oatmeal porridge and given a warm, well-aired and lighted pen, which should be kept clean, dry and well bedded, they will make a vigorous healthy growth and when spring comes the fall calf is large and strong enough to be turned into the pasture.

INCREASE QUALITY

Increase in quality of dairy products can be secured in four ways:

- "First—By buying only good cows.
- "Second—By breeding for improvement.
- "Third—By systematic milk and feed records.
- "Fourth—By better care and management."

LARGE PRODUCTION OF MILK

That From Jersey Has Higher Percentage of Protein Than That From Holstein or Ayrshire.

Which do you prefer, skim milk from a Holstein or from a Jersey cow? It is generally known that Holstein milk has a lower percentage of butterfat than milk from other breeds. Does the skim milk from it have a correspondingly lower percentage of its constituents, chiefly protein and sugar?

Chemical analyses made by A. E. Perkins, dairy chemist at the Ohio experiment station, show that milk

High-Producing Cow.

from Jersey cows has a higher percentage of protein and sugar than Holstein milk. Guernsey milk is quite similar to that of the Jersey, while Ayrshire milk is intermediate between that of these two breeds and the Holstein.

These analyses indicate that the percentage of protein in milk increases with the fat content, but not in proportion. Skim milk from Holstein milk having 3.2 per cent fat contained 3.5 per cent protein, while Jersey milk testing 4.7 per cent fat had 4.1 per cent protein. The variation in sugar content showed a similar tendency. Thus the fat content of milk offers a practical basis to compute the composition of skim milk derived from it.

RAISING CALF ON SKIM MILK

Young Animal Should Be Taught to Eat Grain Early—In No Case Feed It in Milk Ration.

The calf which is to be raised on skim milk should be taught to eat grain early. When they have access to it, many of them will begin eating at two weeks of age or three at the latest.

The grain should be placed in a box where they can easily get at it, and they can be encouraged at first by placing a little in their mouths after they have consumed their milk. Grain can best be fed dry after the milk is fed.

In no case should it be fed in the milk, as in that case it will be gulped down without chewing, which is bad for the digestion.

PREVENT BACTERIA IN MILK

Best Way to Hinder Formation Is to Cool Liquid as Soon as Possible After Being Drawn.

Perhaps the best way to hinder the formation of bacteria in milk is to cool it as quickly as possible in order to remove the "animal heat" after it has been drawn from the udder. Then heat it to a temperature of 100 degrees or even to the boiling point, after which it should be put into bottles, sealed tightly and set away in a place where the temperature is about 50 degrees. Leave it there till you are ready to use it.

POULTRY

BREEDING GEESE FOR PROFIT

Fowls Should Have Considerable Exercise and Be Kept Moderately Thin During Winter.

Old geese lay a greater number and larger eggs and are more reliable than young geese. Nevertheless, it goes to show that it is often easier to buy young geese rather than to attempt to secure any number of old ones. Young geese are better for breeding purposes than young geese. Young geese do not lay as many large eggs or produce as many goslings in the first breeding season as they do in the second. If geese are often changed

Emden Gander.

from one place to another they are not so well adapted to the conditions as being equal, they breed better the second season they are in a locality than the second.

Breeding geese should have considerable exercise and be kept moderately thin in flesh through the winter by light feeding and a free range of facilities for swimming. The Emden gander lay few eggs but make mothers. Geese are grazers and too much grain is not good for them. To insure fertility they should have an abundance of green food and have access to a pond or other body of water. If this is not possible a tub of water set on the surface of the ground may be substituted.

Very early hatching is not desirable, since the goslings do not thrive well unless they have an abundance of grass. For the first two or three days they should be given nothing except grass and water. Later a little feed of scalded cracked corn should be given in addition three times a day. The goslings are liable to be overcome by the heat, and should always have some place of retreat where they may escape the sun's rays. The eggs may be hatched advantageously under hens, but the goslings should be immediately taken away from them. They may be brooded for a short time in outdoor brooders and after that confined in houses at night.

TURKEYS LACK IN VITALITY

White Holland Breed as Hardy as Any Other—All Fowls Easily Susceptible to Disease.

White Holland turkeys are, as a rule, as healthy and hardy as any other

White Holland Turkeys.

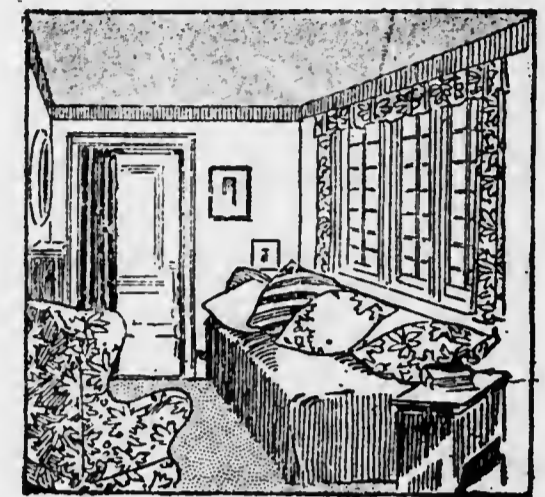

variety, but the great trouble with turkey raising in the United States has been the tendency to too close inbreeding. The present stock lacks vitality and stamina, are easily susceptible to disease, and hence the losses sustained by those who breed them. Observation shows that the birds raised by farmers having free range of the grain fields are the profitable birds. Why? They get exercise, uncontaminated ground, usually roost in trees and get their drinking water at some branch or nearby stream. All the causative agents are avoided. The present effort to correct the tendency to weakness in turkeys, because of inbreeding, through the introduction of wild blood, is meeting with some success.

ANIMAL FOOD FOR CHICKENS

During Winter Something Must Be Provided to Take Place of Grass—hoppers and Other Bugs.

In the summer when the hens lay well they have bugs, worms, grasshoppers and other insects. In the winter they need something to take the place of this kind of food. Cut fresh bone is very good. Half an ounce daily per hen supplies all she needs of this food. High-grade beef scrap is good and is in a very convenient form for feeding. — North Dakota Experiment Station.

The Victor system of changeable needles enables you to meet every acoustic condition

A "fixed point" can't be perfect for all conditions!

If it is perfect for the ball-room it won't be perfect in the den.

If it's perfect in the den it will be inadequate in the ball-room. If it is perfect for one music-room it will not be perfect for another music-room which is different in size, acoustic properties and furnishings.

Consequently changeable needles are best, because—in no other way can reproduced music be perfectly suited to every home and to any room in that home without in the least degree changing the artist's interpretation. That can be done only with the Victrola because of the changeable needles. It can not be done by any sound reproducing instrument which is unable to adapt itself to its own particular surroundings.

There are Victrolas in great variety of styles from \$15 to \$300—easy terms if desired. Come in and we'll gladly play any music you wish to hear and demonstrate the advantages of the Victor system of changeable needles.

IHC Wagons Are Tough

Did you ever notice when one of the wheels of your loaded wagon dropped into a rut or bumped over a stone how the seat springs gave and rebounded, almost throwing you off? That is an indication of the shock and strain that the rigid spokes and axles have to stand whenever the wagon is traveling over a rough road or through a field. IHC wagons

Weber New Bettendorf Columbus or Steel King

take these stresses and strains as a matter of course. From neckyoke to tail board they are built of selected, air-dried lumber, strong and tough, bending to strains but coming back as straight and true as ever when the load is removed. Besides being tough, IHC wagons are light running. The wheels have just the right pitch and gather, and run true. All skains and skain boxes are paired. The running gear is assembled by skilled workmen whose wages depend as much on the quality as on the quantity of the work they turn out. Consequently, IHC wagons are practically all of the same high standard of quality throughout.

Weber and Columbus wagons have wood gears; New Bettendorf and Steel King have steel gears. To learn which IHC wagon is best suited to your work and conditions, write our nearest office for interesting catalogues.

The king can do no wrong—if the other fellow holds all the aces.

If a man falls in love only the woman in the case can rescue him.
She who fishes for a husband seldom catches one who is worth while.
Many a man is out at work for the simple reason that there is no work in him.

Don't put on too many airs as you float down life's stream; your little boat may capsize.
Warships—Vessels that should never be built with money taken from the sinking fund.

If a girl is unable to secure a man's wages in an office she might succeed in getting them by marrying him.
In making a goose Dame Nature required a lot of quills, but a man can make a goose of himself with only one quill.

Don't imagine that the man in the orchestra chair gets a better show for his money than the boy in the gallery.
It is a woman's privilege to wear short sleeved dresses if she wants to. The constitution of the United States says that the right to bear arms shall not be infringed.

Miss Payrolls Make New Record.
Work at the coal mines in Muhlenberg is heavier now than ever known, operations on both the I. C. and V. & N. railroads being at top notch. Last Saturday the First National Bank of this city paid out over \$62,000 for the mines having accounts there, for labor for two weeks. This is the heaviest ever known, and doubtless as much more was paid out by other banks in the county.

There were several occasions during the stirring speech of Gov. Stanley here Saturday night when there should have been patriotic applause, while there was none.
Every Kentuckian must be either a fighter or a giver—no slackers.

Red Cross Winning Strong.
Our Red Cross chapter here is gaining deserved recognition, and the workers are very much encouraged over the support being given them. Including the campaign Saturday night, there were 100 new members secured by noon Tuesday, making a total of 364 members here. Subscriptions to the amount of \$553.50 were secured, bringing the total up to almost \$2,000. The campaign will be continued indefinitely, and everybody is urged to join and subscribe. It is hoped there will be secured at least 1,000 members in the county, and not less than \$3,000 raised, as this will not be what we should really do.

First Troop Call for September 5.
The call for troops for training sets the date for first squad of 30 per cent, on September 5, with similar quotas on the 15 and 30, and the remaining 10 per cent at some later date to be named. This plan will put the war machine at work in better shape, allowing the units to get adjusted in time to take in the later squads. Men who are engaged in farm work will be left out as long as possible, so that they may gather crops and get their affairs in shape to leave home.

There developed many excuses for dodging army service, but few of them received credit. More defective boys have been found here the past few weeks than could have been imagined, and nearly all who were ordered to be examined have been bragging about their diseases and disqualifying deformities. One boy claimed exemption because he was near-sighted, but the board did not think so, and told him that he was just the man wanted, as soldiers were expected to get right up against the Germans, and he would make an excellent first-trench man.

A man who has made a very close study of this war, and who is a keen observer of all things, says that he thinks our government is making a serious mistake in setting out a flat-foot person as one who may not make a good soldier. He bases his statement on the fact that every German is flat-footed, and the world has never seen such soldiers. In his judgment this is a sure mark of a good fighter, perhaps because he cannot run, and he thinks they should be given preference in this draft.

Wanted.
Fifty young men and women for the Business Department of Bethel College, Russellville, Kentucky.
The war has caused a very unusual demand for bookkeepers, stenographers and typists. Bethel college has an exceptionally fine Business Department. Professor Homer Felts, efficient Principal of this department and he is having many calls for graduates which he cannot supply. In order to meet this increased demand a special course will be offered this fall, including Bookkeeping, Stenography, Typewriting, English, Arithmetic, Spelling and Rapid Calculation for only \$50 for five months.

Many of the graduates in this department are holding profitable positions. Four graduates are in the employ of the L. & N. Railroad Company in Russellville. Three others are employed in the local post office. Seven other young ladies are employed in offices in Russellville. Cecil McLean, 16 years old, started at \$60 per month as stenographer for the Crescent Coal Company, Bevier, Kentucky. G. L. Anderson, 17 years old, is stenographer for W. A. Chambers Company, Nashville, Tenn. Miss Effie Lou Davis, who receives a handsome salary writes: "I owe my excellent position with the United States Radiator Corporation to the efficient training I received in the Business Department of Bethel College." Mrs. Lillie D. Moore is teaching Commercial branches in a Business College in North Carolina at a salary of \$90 per month. Mr. Garnett E. Hunt commenced work with the wholesale jewelry firm of Jones, Mounts & Jones of New York three years ago at a nominal salary of \$50 per month and rapidly rose by promotion until he now receives \$5,000 per year.

For further particulars write to Professor Homer Felts, Russellville, Kentucky.
Roark has a full supply of Victor tungs tone needles. Use no other and save your records.
You are in to win if you get a Victrola. Let Roark tell and show you how and why.

Cottage Organ for Sale.
Walnut cabinet organ, Hamilton make, good repair, is offered at a bargain. Apply to Roark.
Work on the W. G. Duncan Coal Co. office building is being pushed right along, and the concrete foundation is nearing completion.

Join the Red Cross. Enlist under the Red Banner of Mercy.

Falls From Motor to Instant Death.
Jesse Howard, 28, was instantly killed in the Creston Coal Co. mine at Bevier at 9 o'clock last Saturday morning when he fell from a motor on which he was "trip" rider. The motor was pulling a string of twenty loaded cars, and as a switch was approached Howard is supposed to have lost his bearing in attempting to alight and throw the switch. The motorman looked back to remove a coupling pin, and when he looked ahead he saw the light on Howard's cap descend. The motor was stopped as quickly as possible, and the driver ran back to the point where Howard appeared to fall. He could not find him, and went down the other side of the cars, with same result, and then came back to the motor, finding the body under the first coal car and life extinct. The body had been rolled and dragged about thirty feet and as there was a clearance of only about seven inches between the bottom of the motor and the roadbed, life was crushed out instantly, not a sound being made by the victim. Both legs were broken, the left in two places, and there were many contusions and cuts all over the body together with internal injuries. Funeral services were held at the home in Cleaton at 2 o'clock Sunday afternoon, and interment was in the Miller graveyard, nearby. A large number of friends attended these services. The widow and two children have the sympathy and interest of everyone, in this sudden sorrow. Howard was born in Ohio county, but had worked at various mines in this county during the past several years, and was well known. He had the day before his death appeared before the examining board here, and passed a splendid examination, and would have responded to his country's call to arms and all who knew him, know he would have made a valiant soldier.

Get LaZaro Victor records at \$1.50 at Roark's.

Weather Forecast for the Week.
Forecast for the week beginning Sunday, Aug. 12, 1917—For Ohio Valley and Tennessee: Unsettled and showers first half; latter half fair; temperature below seasonal average.
Greenville is more sanitary than ever before. Weeds have all been cut, and most of the points of infection have been removed. As a result, health conditions are excellent, and especially an absence of typhoid fever, which is raging all over the State.
Victor records are recognized as supreme, since every machine made is fitted to play them. The real way is to play Victor records on Victor machines, for best results. Let Roark demonstrate for you.
Petty depredations of various sorts are becoming common hereabouts, lately. Gardens, orchards and melon patches are being raided, and thieves are quite active. A concerted effort is being made to apprehend these pilferers, and it is likely there will be some results.
A carload of tin cans was received here Saturday, and distributed to the canning club members over the county. Old Muhlenberg will have more stored food this winter than ever before in its history, but at that there will not be enough, and vast quantities of eatables will have to be purchased, at high prices.
Roark's rubber fly swatter does the work—10 cents.

Be Sure of the Number Before Calling
The telephone directory is issued at frequent intervals for the information and benefit of the telephone-using public.
Every effort is made to keep this list accurate and up-to-date. It is expected that telephone-users will consult it before making calls. A call for an incorrect number causes delay and possible annoyance to a third party.
Avoid inconvenience to all concerned by looking up telephone numbers in the directory before calling.

BE PATRIOTIC—TRADE AT HOME!
The Red Cross work is booming here and is getting spread pretty well all over the county.

Victor supremacy
Before the Victor was offered to the American public, the public only knew music as it was produced on music boxes and cylinder records.
With the invention of the Victor and its disc records, there gradually followed a musical awakening of the American people, for here was music reproduced in exact accord with the artist's interpretation.
And, when the Victor Company, through the lavish expenditure of millions of dollars and the combined efforts of its research and experimental departments, introduced the Victrola to the public, there was immediately established a new standard by which other instruments of like character were measured.
Since this time the gradual decline of the old cylinder types of phonographs and records, has prompted other manufacturers to acknowledge the superiority of the Victrola by adopting a disc type of instrument in imitation of the Victrola, but lacking the exclusive Victrola features which are patented and which no one dares to infringe.
A genuine Victrola costs no more than other instruments that only look like a Victrola.
Victrolas \$15 to \$300. Easy terms, if desired. Come in and we will gladly play any music you wish to hear.

Local Mention.

If you can, do so.

This is our great week.

Don't say you can't but can.

School days are drawing nigh.

Hep, hep! Our boys will soon be drilling.

Save what is made in food supplies.

Mr. Jame Duvall is able to be out, after an attack of fever.

Large stock of mirrors at Roark's. Small prices.

Mrs. Moore is here from Earlington, a guest of Mrs. Sarah Eaves.

The weather man is doing his part toward increasing food supplies.

Muhlenberg school teachers are being entertained by our people this week.

Get any sort of sewing machine equipment from Roark.

Mr. Townes Martin was in Chicago on business this week.

Old newspapers for sale, this office.

Don't quit, don't let down, but speed up is the true slogan for these times.

Let Roark show you some rare wallpaper bargains.

Hogs made a record in Louisville Tuesday, selling at \$17.50 for tops.

No age or any other limit on joining the Red Cross, so step in line.

Some folks say that money will not buy happiness. Just try a \$15 investment in a Victrola at Roark's.

The Red Cross button is a badge of honor, and should be worn worthily by everyone.

There is an abundance of patriotism, but like all good things, most folks will not accept it.

A beautiful, beautiful rain yesterday made conditions very pleasant, and practically assure the early corn.

In this shake up of the world's affairs, some big men are going to be discovered in the development, and many parading as big men are going to be shown to be true worth, to their disgrace.

Governor Enthus Enthus Large Crowd.

Gov. A. O. Stanley drew the largest crowd to the court house Saturday night which has been there in a long while, and his address on the Red Cross and its work thrilled every one present. The Governor has a host of friends in this county, and all sections were represented, as well as visitors from Hopkinsville, Madisonville and other points. At the close of the address a canvass was made by a score of "Red Cross" nurses, and about sixty-five new members were secured, and a very gratifying sum of money in subscriptions. It was a great meeting, and much good will follow it.

This is a time of service and sacrifice, and the profiteer should be submerged.

Mr. Wm. Brizendine was in Louisville on business the first of the week.

Mr. Ike Hart was here from Hopkinsville on business the latter part of the week.

Roark's rubber fly swatter unlimbers like lightning, always gets the fly and never injures the furniture or drapery. Try one, and you'll add full equipment.

We show what we advertise. See the Lyon & Healy pianos at Roark's.

Muhlenberg crops are now practically assured, and will be larger than ever before in our history.

Waste is more a crime now than ever before, for every scrap of food should be preserved.

Mr. and Mrs. J. Hugh Eaves, of Little Rock, are here on a visit to Mrs. Sarah Eaves and other relatives and friends.

Mr. T. J. Bailey was here from Madisonville on professional call a day or two during the week.

Talk is cheap, but service is valuable, and these are the times which are proving it.

As in every avenue, old Muhlenberg will uphold its good name on the field of honor, for our boys have the stamina that is needed to win.

Since it is necessary to defend the freedom which our forefathers won, every boy should be eager to lend his might in the conflict.

Buy Victor products at old prices from Roark. Other concerns are boosting machines and records from 10 to 25 per cent, but there is no announced raise on Victor goods.

About the most uncertain thing in the world today is the price on any item one may mention. The only sure thing is that it will be higher later than it is now.

A local physician last week needed a nurse for a patient, and telephoned to Louisville, Owensboro, Henderson and Evansville, and was not able to secure one, as all were engaged on cases.

Teachers in Institute Work.

Muhlenberg school teachers are changing work this week, being engaged here in annual institute activities, the sessions being held in the circuit court room. Attendance is large, and every session is full of interest. Prof. E. B. Weathers, the instructor, is winning everyone in his talks and suggestions. He is specially fitted for the work, and holds intense attention. Too few of our people are attending, as they are not only missing the good things, but their presence would be an encouragement to the teachers. The program for today and tonight is especially attractive, and tomorrow will bring the institute to an end.

Use tungs-tone needles and save two-thirds the wear on your records. Roark.

A Good Resolution.

Resolved:

With a sincere desire to be of the greatest service to my country, I will strive to maintain a cheerful and rational attitude, I will make the most of what I have in the place where I belong and so assist to preserve a normal condition at home, that when the war is over and our soldier boys return they will find that I have been as faithful and fearless as they.

Mr. Hugh Jernigan arrived from Arizona the first of the week, and will be here some time on a visit to home folks and friends.

Mrs. E. C. Prewitt, of Harrodsburg, and Mr. John Lander, of Burgin, are guests of Mr. and Mrs. J. A. Shaver.

Merchants are having an agreeable increase in business in all lines, and collections are reported excellent.

The American Red Cross is the only volunteer society, authorized by the government to aid our land and naval forces in time of war.

Mrs. Jesse Wallace, of West Point, is here on a visit to her daughter, Mrs. M. W. Williams.

Rev. J. R. McAfee was here from Central City Saturday night to the Red Cross meeting and address by Gov. Stanley.

People are just beginning to get a faint glimpse of the serious conditions being imposed by this world-war. The quicker we learn, the less will be our loss and distress.

Save two thirds the wear on your records by using Victor Tungs-tone needles. Roark's, 2 for 5c. and you should get 500 numbers from your investment.

Mr. W. Duncan Hamilton, who has been in training at Fort Benjamin Harrison, Indianapolis, passed his examination with credit, and has been commissioned a second lieutenant in the regular army.

Mr. and Mrs. J. S. Brizendine and Mrs. Belle Brizendine took a week-end motor trip to Nashville, and on their return were accompanied by Mr. and Mrs. Marcellus Wynne, who had been visiting relatives in and near Nashville.

Kurt By Young Mule.

Mr. J. A. Shaver suffered injuries inflicted by a young mule at his farm east of town, Tuesday afternoon. Mr. Shaver went in the stable where the animal was, and had three ribs broken when thrown against the stall. His condition was favorable yesterday, and no serious results are contemplated.

Pleasing Piano Recital.

Greenville people had a rare treat Tuesday evening, when Mr. Frederick J. Hoffmann, a member of the faculty of the College of Music of Cincinnati, gave a recital at School Auditorium, which was filled by our people and the visiting teachers of the county. Everyone was delighted with the artistic efforts of the performer and his well balanced program. He is a master of technique, and his interpretation and sympathetic handling of every number caused increasing pleasure. The two Nocturnes and the Valse, by Chopin, probably appealed to the teacher, pupil and person with cultivated musical taste, but the old Viennese dance, Schon Rosmarin, by Kreisler, with its brilliance and dash, was received with greatest favor. Miss Margaret Taylor, a pupil of Dr. Hoffmann, secured him for the recital, and our people are very generous in their praise of her act. Miss Taylor will be in charge of the music department at the school this year, and her talents and general ability will make this branch a great help in our advancement.

Buy the instrument the greatest artists of the world select to reproduce their supreme efforts. You can't fool them, and they select the Victrola. Let Roark demonstrate and explain the superior qualities.

Old Pluvius on the job is doing more for us than all other agencies in the food question, but it is a mighty good thing to have a Hoover to keep the supplies from the hands of merciless gamblers.

Chas. McGregory, one year old, died of spinal meningitis Sunday afternoon at the home of his parents Mr. and Mrs. John T. McGregory at Hillside. The body was carried to Morton's Gap Monday for burial.

Get Victor tungs-tone needles from Roark. Laboratory tests extending over a year have demonstrated that two thirds the wear is eliminated by use of these needles, and the Victor Talking Machine Co. recommends the exclusive use of this needle. Plays perfectly, and from 100 to 300 records without change.

Mr. Will P. Longest, who has been in the regular army for sixteen years, and for the past two years has been stationed at Fort Sam Houston, was here for a few days during the week. He has been transferred to Syracuse, N. Y.

Keep money, muscle, brain and heart at work, and under no conditions forget your conscience. This is a season when real men are being tested, as to whether they are big or little, good or bad, patriotic or cowardly, sacrificing or selfish.

The American Red Cross maintains a Bureau of Casualties, whose function is to notify friends and relatives of casualties among the forces abroad and to act as a medium of communication for Americans held prisoners.

Mr. and Mrs. Chas. W. Roark entertained a number of their young friends at the bluff on Green river, Monday night, in honor of their guest, Miss Tola Swann. Swimming, camp fire games and the amusements were enjoyed, and refreshments were served.

One of the vital points of advantage in the Victrola is that it requires less than half the weight to hold the needle in the groove than in any other machine. This accounts for the absence of surface noise in the Victrola. There are many other exclusive, superior advantages, which Roark will gladly demonstrate and explain.

Roark For Everything Musical

Study Food Values

Food provided for the family table deserves the careful thought of every housewife. Do you use thought when buying baking powder?

The quality of cake, biscuits and all quickly raised flour foods depends largely upon the kind of baking powder used.

Royal Baking Powder is made from cream of tartar derived from grapes. It is absolutely pure and has proved its excellence for making food of finest quality and wholesomeness for generations.

Royal Baking Powder contains no alum nor phosphate.

Victor

Citizen Claimed By Death.

Mr. J. L. Osburn, aged 62, died at his home on Main street at 1:30 o'clock last Friday morning, after an illness of a few weeks from a complication of ailments. For some months he had been failing in health but had been able to be up. Deceased was widely known, being engaged in business here for a great many years, and he held the highest respect of all who knew him. Quiet, industrious, congenial, he held a worthy place. Funeral services were held at the home at 10 o'clock Saturday, and interment was in Evergreen cemetery, under Masonic rites, with a host of his comrades in rank. He is survived by his widow and one daughter, Mrs. J. A. Rose, who have the sustaining interest of all our people.

Horses and Buggies Appropriated.

There were people here in vehicles from all parts of the county last Saturday night, to attend the Red Cross speaking by Gov. Stanley, and there was also a colored picnic at Depoy. The two affairs had some connection, for two vehicles were driven from court square to the Depoy affair. The double team to a buggy belonging to Mr. Henry Lovell was taken in charge by two negroes, who had a mishap in front of Mr. L. W. Irvin's home, on Hopkinsville street when they ran into a car driven by Mr. Clay Boney, wrecking the car and seriously cutting both the horses. The negroes made their escape, but are known, and will be caught if they return here. A horse and buggy belonging to Mr. Tom Heltsley was also taken, and officers

located the rig at Depoy, hiding until Marvin Johnson, colored, came and started off in it, when they nabbed him. He had an examining trial Tuesday, and is in jail awaiting the action of the grand jury. Johnson has been in the penitentiary twice, it is said.

Hear the wonderful \$15 Victrola at Roark's and test it thoroughly in comparison with other makes at three times the price.

Merchants of Greenville are wide awake and seeking increased business. Trade with them in confident assurance of best goods at lowest prices.

Typewriter ribbons, paper, supplies at this office.

THE KITCHEN CABINET

The fault of the age is mad endeavor to keep to heights that were made to climb. By a burst of strength, or a thought that is clever. We plan to outwit and forestall time.

EAT MORE FRUIT.

The days are past when the orange was a luxury. It is an every-day fruit, found in the market from one year's end to the next. There are seasons when the fruit is more plentiful, and then is the time to prepare for the season of higher prices. It is hardly necessary to mention that the orange is a liver stimulant and a gentle laxative, for its virtues are too well known. The mineral matter which it contains is not so well understood, and this is the chief or one of the chief important elements which make the fruit highly valuable. Oranges contain phosphates, which are a nerve food and are most useful in cases of lassitude. As a refreshing tonic, to be carefully successful it should be eaten at least a half hour before breakfast. The juice strained may be given to very young children, not too near the milk feeding. The orange may be served in such a variety of attractive ways. Sliced oranges make a most attractive dish. Peel the orange and remove all the white skin. Slice very thin, removing any seeds if present; arrange the slices overlapping on a small glass platter or oblong plate, sprinkle lightly with powdered sugar and garnish with candied cherries.

As a salad, a most delicious combination is oranges, pineapple, a few dates, and quartered marshmallows served with any dressing made thick with whipped cream. When oranges are used as salad for fish or duck, the dressing should be a French one, using lemon juice for the acid.

For serving an invalid, the orange should be peeled and all the skin from each section removed; then arrange around a mound of sugar and serve. An orange prepared flower fashion is a most dainty way to serve the fruit. Cut down the skin in eightths to within an inch from the blossom end, then strip down in points and fold or turn them in. The orange may then be pulled apart in sections. Another method is to peel the orange, leaving an inch or half inch band around the fruit, equator fashion. Then spread open and the sections are easily removed.

Nellie Maxwell

THE KITCHEN CABINET

It is a necessary to all the dishes, as well as the pleasure of life, that the cup of pandering it is equal to the folly—Mr. Johnson.

HONEY DISHES.

Honey is the nectar of flowers gathered by bees and ripened by them in the hive. The nectar is changed in the honey sac so that it finally becomes a delicious honey. Different flavors of honey are made from different flowers. Honey is a natural sweet; foods prepared from honey will keep better than those prepared from sugar and molasses.

Honey Tea Cake.—Take a cupful of strained honey, a half cupful of sour cream, two eggs, half a cupful of shortening, two cupfuls of flour, a half teaspoonful of soda, a half teaspoonful of cream tartar, salt, the amount depending upon the shortening used. Bake 25 minutes in a moderate oven.

Oscarin Honey Layer Cake.—Take two-thirds of a cupful of butter, one cupful of honey, three eggs well beaten, half a cupful of sugar, two cupfuls of flour and a teaspoonful of baking powder. Bake in layers and fill with whipped cream mixed with strained honey to sweeten.

Honey Cookies.—Take one cupful each of honey, sugar, butter, and sour cream, add three well-beaten eggs, a teaspoonful of soda, a teaspoonful of baking powder and flour to fill.

Honey Jumbles.—Chop fine a fourth of a pound each of citron and candied orange peel, place in a dish and just cover with warm strained honey, let stand overnight in a warm place. Beat two eggs, add a cupful of sugar, then add the fruit and honey, a little salt and 2½ cupfuls of flour sifted with two teaspoonfuls of baking powder, knead to a smooth dough, roll out very thin and cut in fancy shapes.

Pumpkin Pie.—To a cupful of pumpkin add a cupful of honey, two eggs, a pint of rich milk, a teaspoonful of ginger, a teaspoonful of nutmeg, and a fourth of a teaspoonful of cinnamon, salt, milk and fill a shell. Bake slowly.

Honey Sauce for Puddings.—Boil a cupful of honey with a fourth of a cupful of water, a tablespoonful of cinnamon, and the juice of a lemon for 15 minutes.

Butterscotch.—Take a cupful of butter, two cupfuls of sugar, two cupfuls of strained honey, a teaspoonful of cinnamon, boil ten minutes; pour into buttered pans and mark off in squares.

Nellie Maxwell

POULTRY FACTS

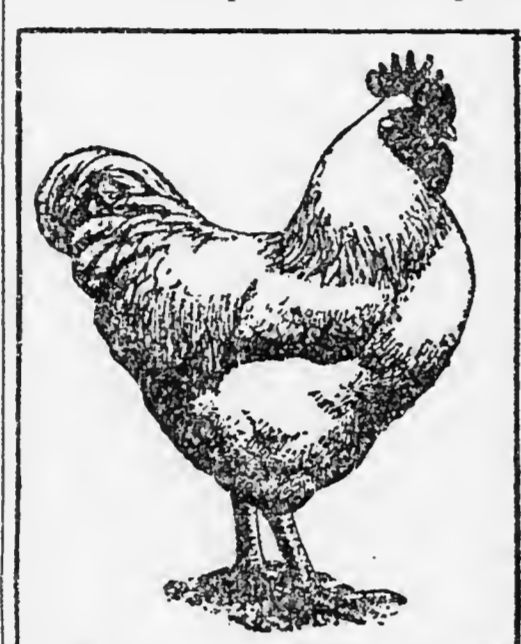

PLYMOUTH ROCK IS POPULAR

Bred as First Originated Was of Barred Variety—White is Hardy and Adapted to Farms.

The most popular of all American breeds of poultry is the Plymouth Rock. This breed as first originated was of the Barred variety, which is yet the most popular of all the colors. Early in the breeding of Barred Plymouth Rocks fanciers reported the appearance of white chicks. They were "sports" and some were bred together, producing the present variety of White Plymouth Rocks. They have attained great popularity, which breed, both for utility and fancy, and have proven perfectly satisfactory in other capacities.

They are hardy and especially adapted to farms. The hens lay large dark brown eggs of a grade much sought in certain localities. The chicks are vigorous, strong and active, and grow exceptionally fast on range, reaching maturity at four and one-half to six and one-half months old. They are readily suitable for the highest grade of market poultry at all ages from broiler size to full maturity, and are very popular in some sections for the production of capons.

Males weigh from 8 to 11 pounds, females 7 to 10 pounds, and are prob-

White Plymouth Rock Cock.

ably the largest of all the Plymouth Rock family. Their plumage should be pure white, legs and beak deep rich yellow, combs small, single and fine. Such a fowl not only dresses to the best advantage and commands best prices, but is also very attractive in large flocks.

GIVE SOUR MILK TO CHICKS

Found Beneficial in Cases of White Diarrhea by Professor Kaupp of North Carolina.

When white diarrhea attacks a flock of young chicks many of them die, while those that survive are more or less stunted. Feeding freely on sour milk has been found beneficial. If sour milk does not act against the disease it at least gives the chicks greater strength and vitality so they are not seriously affected if attacked.

In some tests by Professor Kaupp of North Carolina he found that chicks fed on sour milk quickly recovered when attacked and the loss was only 10 to 15 per cent. In a similar lot, handled and fed the same except for the milk, the loss was 24 per cent the first month, while the remainder were in such a weakened condition that at the end of eight weeks 26 per cent had died.

TO GET EGGS DURING WINTER

Comfortable Houses Must Be Provided to Secure Most Profitable Results From Hens.

Times have changed since chickens roosted out on the trees and fences. Once in a while you may see such farms where hens are permitted to follow this old way of roosting. But as a rule every hen must pay a profit or she goes to market and at an early age too. Hens are menaced by the number of eggs they lay instead of by the number of pounds they weigh. Expensive houses are not necessary but must be comfortable to insure proper egg laying. A house should accommodate as many hens as space calls for without crowding; about two square feet of floor space per hen is about right. This keeps up the temperature in cold nights and still gives scratching space to insure egg production.

BRIGHTEN UP POULTRY HOUSE

Coat of Whitewash Given on First Warm Day Will Make Surroundings More Cheerful.

If the poultry house is dark and gloomy, give it a coat of whitewash on the first warm day and see how much brighter it will be and make it more cheerful for the fowls. Surroundings space considerable difference in the egg yield.

SCRATCHED BY A CAT?

Well, That Wasn't the Story the Man Told About His Face.

The man next to the front door in the street car had stripes of ointment plaster crisscrossed on his face, and it looked to everybody as if he had been in battle. After a time the man next to him timidly inquired:

"You have suffered an accident?"

"No; it wasn't exactly an accident," was the reply.

"Perhaps you took the family cat up in your lap, and she suddenly clawed you?"

"No; the cat didn't claw me."

"I didn't know but what your cat was a vicious animal."

"No; she is sweet and good tempered."

"But your face has been mightily scratched," protested the inquirer.

"Yes; it has been badly scratched, but don't blame the innocent cat. It was a different animal altogether. I called upon a widow. I loved her. She refused me. I would not take no for an answer. I said I would never leave her house until she promised to be mine. I had read that that was the way to handle a widow."

"And did you find it so?" was asked.

"I did not, as the scratches bear testimony. No; it wasn't the cat's claws, but it was the widow's finger nails that furrowed my face. That's all, my friend, except that instead of posing again, as I intended to do, I got outdoors and lost my love for her at a 2:40 gait."—Exchange.

Pleasant Thoughts.

The pleasantest things in the world are pleasant thoughts, and the greatest art in life is to have as many of them as possible.—Bovee.

A Giveaway.

Mistress—Jane, some of the bedclothes is missing. Was any of it left out of doors overnight?

Bessie (aged six)—Jane isn't to blame, mamma. I know where it is. Papa's got it.

Mother—What do you mean, child?

Bessie—I heard some of the folks next door say this morning they saw papa with three sheets in the wind.—Boston Transcript.

Didn't Stop Her.

Two rather tough citizens of lower New York had been cruising in a launch in the North river when they were struck by a small vessel started then drifting toward a dock at the rate of about fifteen knots. Prudent after unsuccessful efforts to start the engine, the man at the wheel yelled to

"BOW HER OVERBOARD."

His companion up forward, "Hey, trow dat anchor overboard; if yuh don't we'll hit dat dock."

Hurling bags and bundles piled on top the anchor right and left, the man at the bow finally pulled up the anchor, but yelled back that there was no rope attached to it.

"Dat don't make no difference. Trow her overboard anyway!"

Recalling the story later, the man who was in the bow said, "So I trow her, and, gee, we did hit dat dock."—Washington Post.

THE MAINE.

OF the land a vision rolls. Wraiths of "two hundred sixty souls."

Drowned or killed in the holocaust, Sacrificed when the Maine was lost.

Of winning eggs was heard or passed. Till came the deep moaned thunder of the blast.

Setting down to the harbor's bed, Carrying brave uncombed dead. The surging waters' sad refrain. Lays yeid dirge of the sunken Maine.

The world was shocked, and all hearts thrilled. With horror, though such voices were stifled.

"Vengeance is mine," Thus saith the Lord, Though justice comes through fire and sword.

Our brave men did not die in vain. Freedom sprung forth as sank the Maine.

Oppression's clanking chains gave way. And Cuba stands redeemed today.

Letters lay deep in jutting stone. When years in centuries have grown.

Will tell to unborn millions, they. What followed death of martyred men.

'Twas ever thus, 'twill ever be—Sacrifice cradles Liberty.

—Augustus Treadwell.

The J. L. ROARK ESTATE
GREENVILLE, KENTUCKY

A History of Muhlenberg County

BY OTTO A. ROTHERT

THIS book tells of the wilderness conquered, and of the adventures of the men and women who founded and developed the county up to and since the beginning of the railroad era, and made possible the achievements of to-day. It is the story of the county from the standpoint of its personal and public traditions, which have been arranged in related groups and form an almost continuous narrative.

It was published in 1913. Competent judges have pronounced it the best county history ever published in the United States. The *Courier-Journal* says, "The book is worthy of study, not only for the pictures it gives of early times and early society, but for the wealth of its curious and valuable illustrations and its expositions of the industrial and social progress of the county and its towns." The *Western Recorder* says, "It is more interesting than a good novel; it will interest old and young alike." The *Greenville Record* says, "Every Muhlenberger and former citizen of the county will value the book far above the price at which it is offered." The *American Historical Review* says, "The book not only contains much that is of interest to the student of Kentucky history but is written in a pleasing style."

It is a labor of love offered at cost of production, the author's time and work being contributed. The book contains 500 pages, 240 excellent illustrations and a complete index. It is printed on a superior quality of paper and is handsomely bound in dark red cloth.

STOMACH TROUBLE

Mr. Marion Holcomb, of Nancy, Ky., says: "For quite a long while I suffered with stomach trouble. I would have pains and a heavy feeling after my meals, a most disagreeable taste in my mouth. If I ate anything with butter, oil or grease, I would spit it up. I began to have regular sick headache. I had used pills and tablets, but after a course of these, I would be constipated. It just seemed to tear my stomach all up. I found they were no good at all for my trouble. I heard

THEDFORD'S

BLACK-DRAUGHT

recommended very highly, so began to use it. It cured me. I keep it in the house all the time. It is the best liver medicine made. I do not have sick headache or stomach trouble any more." Black-Draught acts on the faded liver and helps it to do its important work of throwing out waste materials and poisons from the system. This medicine should be in every household for use in time of need. Get a package today. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c a package. All druggists.
